EDUCATION

National Diploma/ Mechatronics Engineering 2024 – present
Yaba College of Technology Lagos, Nigeria

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Freelance) 2023 – present
Self-employed / Remote Clients
- Built custom web applications for individuals and small businesses
- Designed user interfaces, developed backend logic, and managed deployments
- Handled features such as complaint systems, user dashboards, authentication, and real-time notifications using PHP, JavaScript, and Bootstrap.

Software Engineering Intern 2024 – 2025
Digital Technology Academy
- Worked closely with senior developers to build and test web applications.
- Assisted in frontend and backend development tasks using modern tools and best practices.
- Gained hands-on experience with responsive design, version control, and real-time collaboration on projects.

Web Developer 2024 – present
LoveView Estates (UK-based Real Estate Agency)
- Designed and developed the company's official website from scratch. Focused on creating a user-friendly, mobile-responsive platform that showcases property listings, services, and client trust.
- Implemented a clean interface, intuitive navigation, and strong visual branding to reflect the agency's professionalism and UK real estate focus.

Product Developer / Community Manager 2023 – 2025
WheatChain Protocol
- Developed and managed features for a DeFi crowdfunding protocol. Built both web and Telegram mini-apps, integrated blockchain wallet connections, and managed a small online community.
- Handled platform logic, user flows, and coordinated updates post-rebrand and relaunch.

Software Engineering Program 2022 – 2023
ALX Africa
- Completed a comprehensive software engineering program covering programming fundamentals, data structures, algorithms, system engineering, DevOps, and modern development practices.
- Gained hands-on experience through numerous projects and collaborative assignments.

SKILLS

React.js
Building dynamic UIs with reusable components, hooks, and state management

Next.js
Server-side rendering, API routes, and optimized routing

JavaScript (ES6+)
Writing clean, functional, and modern JavaScript code

TypeScript
Strongly-typed code for scalability and fewer runtime errors

Tailwind CSS / Bootstrap
Responsive UI development using utility-first or component-based styling

AJAX & REST APIs
Seamless client-server communication for dynamic data

PHP
Server-side scripting for form handling, auth, and logic

MySQL / PostgreSQL
Relational database management and integration

Firebase / Supabase
Used for authentication, storage, and quick backends

Git & GitHub
Version control, project collaboration, and codebase management

PROJECTS

LoveView Estates
Real Estate Website for UK Property Firm
LoveView Estates is a real estate website built for a UK-based property agency. It allows users to browse property listings, view detailed descriptions and images, and send inquiries. The site is designed with a clean layout, responsive design, and admin-controlled content management.
Tech Stack: Next.js, Supabase, Tailwind CSS, TypeScript

Complaint Management System
Internal Web App for Organizational Complaint Handling
Complaint Management System is a web-based platform designed to help organizations receive and manage internal complaints. Users can submit complaints with file attachments and set urgency levels, while admins review and respond from a dedicated dashboard with real-time updates.
Tech Stack: Next.js, PostgreSQL, Tailwind CSS, TypeScript

Developer Portfolio Website
Personal Portfolio to Showcase Projects and Skills
This is a personal project built to showcase my skills, featured projects, and contact information. It offers a clean, fast-loading, mobile-friendly interface with subtle animations and a focus on user experience.
Tech Stack: Next.js, Tailwind CSS, TypeScript, Vercel

Student Result Management System (SRMS)
Student Result Management System (SRMS) is a web-based application designed to help educational institutions securely manage and retrieve student academic results. It allows administrators to add, update, and delete student records, assign grades, and provides a login portal for students to view their results.
Tech Stack: PHP, MySQL, AJAX, Bootstrap

CERTIFICATES

ALX Software Engineering Program – Graduate — Completed in-depth training in Python, Bash scripting, C, system engineering, data structures, algorithms, and backend fundamentals. Emphasis on problem-solving and production-grade code quality. | **FreeCodeCamp: Responsive Web Design Certification** — Built projects and solved challenges in HTML, CSS, Flexbox, Grid, and Bootstrap (300+ hours).

The Complete Web Development Bootcamp (Udemy – Dr. Angela Yu) — Practical full-stack development course using Node.js, Express, MongoDB, React, APIs, and more.
